

DIVE DEMO SOLIS TITANIUM 4G

新機能

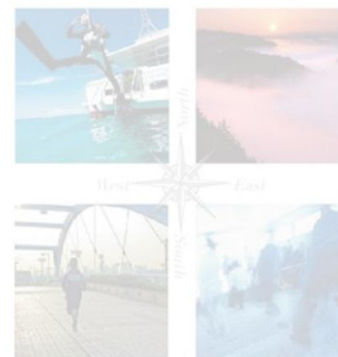

- Response Capacity to the 4 Gas Changes
- Freedive Mode
- Gauge Mode
- Depth Interval Alarm

DIVE DEMO SOLIS TITANIUM 4G New

Further evolution without a compromise accelerates.

In response to the trust of the divers, to all the people who love the sea and nature. A new model with additional functions such as "Response Capacity to the 4 Gas Changes", "Freediving Mode" and "Gauge Mode" comes out in DIVE DEMO SOLIS TITANIUM which gets tremendous support by the titanium body equipped with intensity and lightness and the solar battery which also harmonizes with nature. It shows its presence with the function which evolved and the solid form.

As the gear supporting your pleasure diving in the sea, as the watch giving off salty scent in the town, it always acts with you. Dive computer called the status of the diver, SOLIS 4G.

New laurels added to the legend again.

What reached the highest state of a function is beautiful. Unchallenged presence leads to the trust of gear. The new crown called a "Good Design Award" was added to the legend of dive computer, DIVE DEMO SOLIS TITANIUM, of Bism in 2014. DD3400 (type A) of the face design showing the calm sea, and DD3401 (type G) designed the sunlight as the face design. In spite of the compact body trimmed waste, its sharp form holding the strength was highly evaluated. Also, the design which harmonizes with a daily life scene while pursuing operability, durability and safety is unrivaled one. To a diver's arm, SOLIS.
